Art Unit: 1654

1. Claims 1-29 are pending in this application.
2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification is not enabling for identifying antimicrobial activity of any and all peptides as claimed in the present invention. Alternatively, the method of the invention claimed does not distinguish the instant "antimicrobial peptides identified from antimicrobial peptides in other known inventions. The specification is not enabling for identifying the antimicrobial activity of peptides that react with other peptide(s) in the "plurality of peptides" contacted with the infective microorganism. The specification is not enabling for identifying each peptide(s) causing cell death of the infective microorganism when contacted with a "plurality of peptides". Correction is required to resolve doubt raised about satisfactory enablement of the subject matter claimed.

Art Unit: 1654

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 and 24 are indefinite because the metes and bounds of "plurality of peptides" can not be determined. It is unclear if the instant method step intends "plurality of peptides" to mean contacting many of the same peptides or many peptides from different origins.

Claim 1 is indefinite because the method steps contain the typographical error "3" in line 4 of this claim.

Correction is required to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 5-23 and 25-29 are allowable over the prior art of record.

5. The Schenkel et al (US 4710377), Selsted et al (US 5,324,716), and Lawyer et al references (US 5,994,306 and 6,262,243) have been cited to further show the state of this art.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louise N. Leary whose telephone number is (703) 308-3533. The examiner can normally be reached on Monday to Friday from 10 to 6 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached on (703) 306-3220. The fax phone number for the organization where this application or proceeding is assigned is (703)308-4556.
